EXPERIENCE

Network Engineering Intern

May 2026 – Jun 2026

NABS Integrated Technical Services

Dubai, UAE

- Completed an 4-week hands-on internship in enterprise networking, configuring VLANs, trunking, and Layer 2/3 switching with Cisco infrastructure.
- Implemented OSPF and EIGRP routing alongside STP and EtherChannel for redundancy in a full enterprise network topology capstone project; earned a structured cabling certification (WR9100) through CommScope's Infrastructure Academy.

Grader — Design & Analysis of Algorithms

Jan 2026 – Present

American University of Sharjah

- Evaluated weekly algorithm design submissions for 35 students, providing structured feedback on correctness proofs and asymptotic complexity.

Co-Founder & Vice President

Jan 2026 – Aug 2026

Blockchain Club, American University of Sharjah

- Co-founded the club and planned inaugural technical and educational events, driving early member engagement.

Undergraduate Researcher — IoT Security Profile Selection

Nov 2025 – Present

Advised by Dr. Anastassia Gharib

- Co-developed an IoT security framework using ASCON encryption and behavioral credit scoring, deployed on Raspberry Pi devices.
- Tested system resilience against simulated attacks as part of a two-person research team.
- Co-authoring a research paper on findings, currently under preparation for publication.

PROJECTS

AUS QuickServe | *HTML, CSS, JavaScript, MySQL*

- Developed a food ordering platform for users and staff as part of a university team project.
- Implemented MySQL-backed order, user, and receipt management features.

To-Do List Web App & Desktop App | *HTML, CSS, JavaScript, Node.js, Electron*

- Integrated an AI chatbot powered by Groq (LLaMA-3.3-70b) via Node.js/Express backend to help users manage and prioritize tasks.
- Built a full-stack task management app with subtasks, due dates, and priority starring; converted to desktop using Electron.

SKILLS

Programming Languages: Python, Java, C++, SQL, MATLAB

Web: HTML, CSS, JavaScript

Libraries: Pandas, NumPy, Matplotlib, Node.js, Express, Electron

Database: MySQL

AI & Tools: GROQ API, LLM Integration, Deep Learning (TensorFlow/Keras), Quantum Machine Learning, GitHub, VS Code

EDUCATION

Bachelor of Science in Computer Science

2023 – Expected 2027

American University of Sharjah (AUS)

- Relevant Coursework: Data Structures, Web Application Programming, Computer Networks

CERTIFICATIONS

- Quantum Machine Learning — IBM
- Deep Learning A-Z: DL, AI in Python & AWS — Udemy
- CCNA 200-301 Network Fundamentals — Simplilearn
- Mandatory RCR for Research Scholars — CITI Program
- Python for Data Science — AUS
